How does Virtual Sports Betting work?

Not every sporting betting opportunity on an online sportsbook features real-life competitors.

Soon, other virtual sports such as greyhound racing, speedway, football, tennis, cycling, and motor racing were launched giving customers more and more to bet on.

The virtual sports are actually fixed odds events that use a random number generator to determine the winner.

With virtual football, you can bet on the match results, under or over, a double chance or correct score.

You are not able to cash out any bets placed on virtual sports.

Betting on virtual sports should be seen as a bit of fun with low stakes that might just produce some winners.

More about betting opportunities
